Faisal Harray

Faisal Harray | B.Tech in CSE @ Islamic University of Science and Technology | Web Developer | Continuous Learner
Jammu & Kashmir, India

Summary

Hello, I'm Faisal Harray, a computer science student at the Islamic University of Science and Technology specializing in software engineering. I am passionate about using technology to make a positive impact on the world and strive to be a valuable asset to the tech industry. My skillset includes expertise in multiple programming languages such as C, C++, SQL, and JavaScript. I have experience working with popular frameworks like Bootstrap, and Tailwind css. I am a dedicated and ambitious individual who is constantly looking to learn and improve my skills.

In addition to my passion for technology, I am interested in video games, which enhance my problem-solving skills and improve my ability to make decisions under pressure. Gaming also motivates me to set new goals every time I accomplish one.

I am always open to new opportunities and collaborations. Connect with me on LinkedIn to stay updated on my latest projects and to work together on innovative ideas.

Experience

Hotel Reservation Platform
Frontend Developer

- Platform built with Next.js to enhance user experience for hotel bookings.
- Built a responsive site with real-time room availability and seamless UI transitions.
  - Key Result: Improved booking experience with faster interface and smoother flow.
- Integrated secure booking flow and optimized layouts for mobile users.

Hotel Management System
Full Stack Engineer

- A comprehensive system for managing hotel operations and enhancing booking efficiency.
- Developed a dashboard for managing bookings, check-ins, check-outs, and guest data.
  - Key Result: Faster booking workflow and simplified staff operations.
- Automated daily workflows to minimize manual effort and errors.

Kwitter
Full Stack Engineer

- University Social Networking Web App providing a platform for real-time student interactions.
- Created a real-time social feed for students to post and like updates.
- Implemented secure sign-up with university ID verification and admin approval tools.
  - Key Results: Smooth feed performance, low-latency interactions, and scalable database structure.

ZoonCare
Full Stack Engineer

- Online Healthcare Appointment System focusing on automating clinic workflows and patient management.
- Developed a comprehensive platform for patient-doctor interactions, including appointment booking and queue tracking.
- Designed secure authentication and role-based access to enhance clinic workflows.
  - Stack: JavaScript (React), NodeJs (Express, Mongoose), MongoDb
- Automated clinic bookings, patient queues, and doctor scheduling to reduce workload.

QuantumTechAI
Full Stack Engineer
February 2026 - Present (7 months)
Srinagar

Working as a full-stack developer building end-to-end digital products, from early business ideas to fully deployed solutions. My role involves designing and developing scalable applications, handling both frontend and backend systems, and ensuring that every product is reliable, secure, and ready for real-world use.

I work closely with the team to turn concepts into functional products, focusing on performance, security, encryption practices, and clean architecture. This includes building APIs, developing user interfaces, integrating services, and maintaining efficient data handling across the stack.

The goal is always to deliver high-quality products that solve real problems while maintaining strong standards in security, scalability, and user experience.

Education

Islamic University of Science & Technology, Pulwama

Bachelor of Technology - BTech, Computer Science · (September 2023 - September 2027)

govt.boys high school jawaharnagar

12th, frontend developer · (2020)
